

## **GREASE INTERCEPTORS**

*Outperforms Concrete  
Just as economical*

**ROCKFORD SEPARATORS**

# ***Because concrete interceptors aren't all they're cracked up to be...***

A concrete interceptor might seem like a 'solid' idea at the time. But before too long that concrete will begin to break down. Ever-widening cracks in the concrete, and its inherent porosity, bring the potential for leakage of waste material into the surrounding area, and seepage into the water table. With today's tough environmental standards, and federal, state and local regulations more stringent than ever, what seemed like such a 'concrete' idea at the time won't hold much water.

Why take a chance on concrete, when there's a better alternative made from steel? The new RGI Series from Rockford Separators. Solid!

***The new RGI Grease Interceptors: designed to outperform concrete at every level.***

Leave it to Rockford Separators to develop a superior, and highly economical alternative to concrete grease interceptors. It's called the RGI Series. Because they're steel, the RGI series are inherently lighter, stronger, and more durable and reliable than concrete. Installation is easier, faster and more economical too, since the RGI goes in as a single, integral unit, vs. the more time-consuming assembly on-site of multiple concrete sections.

\* See manufacturer for details.

**Priced right.**

But what really makes the RGI so attractive as compared to both concrete and competitive steel units is the price. Rockford Separators has aggressively driven down RGI production costs, so the cost of getting a RGI unit to the job site now is not as big of an expense.

**Strength – and flexibility.**

Concrete might look good on paper – until you start trying to fit it to your particular application. Will the concrete unit have to be modified on-site to get the riser heights right? The RGI's riser heights are built to your specifications, and integrated into the structure itself. With 17 models and holding capacities ranging from 150 gallons to 10,000 gallons, meeting your requirements has never been faster, easier or more economical. The RGI even comes standard with an H-20 load rating.

## ***Easy, economical installation...built to your specs!***

Pick it up, drop it in, start using it. With RGI's light, single-piece steel construction, it's that simple. With concrete – not so much. Heavy, multiple piece assembly is usually required, taking more time, equipment and manpower. In addition, the RGI can be built to your specs, with riser heights tailored to your particular installation requirements, and already integrated into the unit when it arrives on-site. With concrete, extra steps, and more costly installation time, are needed to get it right.

## RGI SERIES SPECIFICATIONS

| Model      | Liquid Holding Capacity | Pipe Size | Top to Center |          | Bottom to Center |         | Width E | Length F | Height* G | Shipping Weight |
|------------|-------------------------|-----------|---------------|----------|------------------|---------|---------|----------|-----------|-----------------|
|            |                         |           | Outlet* A     | Inlet* B | Outlet C         | Inlet D |         |          |           |                 |
| RGI-150    | 150                     | 4.00      | 18.00         | 16.00    | 24.00            | 26.00   | 34.00   | 48.00    | 36.00     | 750             |
| RGI-250    | 250                     | 4.00      | 18.00         | 16.00    | 38.00            | 40.00   | 34.00   | 48.00    | 50.00     | 1,100           |
| RGI-350    | 350                     | 4.00      | 18.00         | 16.00    | 42.00            | 44.00   | 42.00   | 48.00    | 54.00     | 1,200           |
| RGI-500    | 500                     | 4.00      | 18.00         | 16.00    | 42.00            | 44.00   | 48.00   | 60.00    | 54.00     | 1,450           |
| RGI-750    | 750                     | 4.00      | 18.00         | 16.00    | 48.00            | 50.00   | 48.00   | 84.00    | 60.00     | 1,900           |
| RGI-1,000  | 1,000                   | 4.00      | 18.00         | 16.00    | 48.00            | 50.00   | 54.00   | 96.00    | 60.00     | 2,200           |
| RGI-1,250  | 1,250                   | 4.00      | 16.00         | 14.00    | 50.00            | 52.00   | 60.00   | 102.00   | 60.00     | 2,500           |
| RGI-1,500  | 1,500                   | 4.00      | 16.00         | 14.00    | 50.00            | 52.00   | 60.00   | 120.00   | 60.00     | 2,800           |
